

The background is a solid blue gradient. At the top, there are several thin, wavy lines in shades of blue and green, creating a sense of movement or a horizon line. The rest of the background is a uniform blue.

INTRODUCTION TO JAVAMAIL API

API

It is a collection of prewritten packages, classes, and interfaces with their respective methods, fields and constructors.

JAVAMAIL API / Jakarta MAIL API

- The Jakarta Mail API has a wide range of classes and interfaces that can be used for sending, reading, and performing other actions with email messages—just like in a typical mailing system.
- **javax.mail**
 - **javax.mail.Session**
 - **javax.mail.Message**
 - **javax.mail.Address**
 - **javax.mail.Authenticator**
 - **javax.mail.Transport**
- **javax.mail.internet**
 - **javax.mail.internet.MimeMessage**
 - **javax.mail.internet.InternetAddress**

Session

- Methods:
 - **getDefaultInstance()**, which returns the default session
 - **getInstance()**, which returns a new session

Message

- The **Message** class is an abstract class.

MimeMessage

- Methods:
 - **setFrom(Address addresses)**
 - **setRecipients(Message.RecipientType type, String addresses)**
 - **setSubject(String subject)**
 - **setText(String text)**
